## Definition

Poplar heartwood modules without glue or additives help to enrich the environment.

The wood used is totally natural.

## Product Objective

The aim is to provide a simple product that is safe and easy to handle to improve the animal's environment in accordance with current regulations on animal well-being.

Top Brick stimulates the animal's play instinct, encouraging it to chew and have fun. It helps to satisfy the animal's natural instinct to gnaw. Its physical properties help improve the animal's dental hygiene.

This product complies with GLP. It encourages the animal to explore and contributes to its well-being. By enriching the animal's environment, this natural toy made of wood reduces abnormal behaviour such as aggressiveness and apathy.

Top Brick can be cleaned, washed and treated in an autoclave. It can be used several times.

## Product Presentation
